Portable Transport Case with PTC² Technology

Patent
Pending

When your Gas Meters are charged and calibrated, they work like they're supposed to. And confidence in your equipment is critical.

So we've developed a must have accessory that makes both of these tasks simple using our patented PTC² Technology. PTC² is Pass Thru Charging and Pass Thru Calibration.

Plug in the case and all the meters inside are charging.

Onboard calibration cylinders and bulkhead fittings allow for a quick bump check or full calibration, anywhere.

We don't make the equipment, we make the equipment better. And better is good for everyone!

Contact us right now for more information on the PTC².
